HEALTHY, SUSTAINABLE URBAN COMMUNITIES & STORMWATER MANAGEMENT

This workshop explores several stormwater Best Management Practices (BMPs) options for locations along the Lower Ballona Creek. EPA defines stormwater BMPs as "methods that have been determined to be the most effective, practical means of preventing or reducing pollution from non-point sources."

Many of the BMPs are multi-benefit solutions that provide additional benefits to the communities, by creating urban green space, recreation opportunities, transportation corridors, amongst others.
